For immediate release:

We're excited to announce our upcoming film project with A&E's LIVE PD. Beginning tomorrow night at 9 pm, LIVE PD film crews will ride with our Field Operations deputies for the next six weeks as they perform their duties. The show airs on the A&E Network on Friday and Saturday nights from 9 pm – midnight (EST).

We accepted LIVE PD's invitation to film so that we can highlight the professionalism of our hardworking deputies and give citizens a realistic glimpse into the services we provide our community.

Viewers nationwide can tune in to watch our deputies as they patrol, serve warrants and utilize cutting edge technology such as our License Plate Reader cameras, which scan thousands of license plates per minute. We've successfully used this technology since 2009 to locate wanted persons and look forward to educating the public about it.

"I'm proud of our deputies and think this project will give citizens a greater appreciation for the good work they do," says Sheriff Butch Conway.

LIVE PD is a documentary series hosted by Dan Abrams (Chief Legal Analyst, ABC News) that highlights the daily activities of on duty law enforcement officers as they perform their duties. Each episode features 6-7 geographically diverse cities, which rotate each week.
